

Grey enables a variety of decorative effects

Depending on the nuance, it appears cool, warm or charming. The *bluish grey 05* is expressive and lively. This gives rooms an aesthetic and modern look. Only natural materials with simple colour tones such as wispy complete the hip Scandi style.

ABOUT AURO

AURO is the consistent forerunner and pioneer in the field of ecological natural paints and wood care products. The innovative and modern company has always consciously relied on substances from vegetable and mineral sources for its paints, varnishes, woodstains, oils and waxes. The combination of high-performance natural products with premium technical quality is unique. The technical know-how and the special selection and composition of the ingredients make the paints extraordinary. High-quality, pure mineral pigments are used to create authentic colour shades with high aesthetic standards. AURO products can easily be returned to the material cycle of nature, as can all woods treated with them. Since the company was founded in 1983, the guiding principles of sustainability have determined our entrepreneurial activities: Renewability, degradability and social aspects. AURO products are thus a consistently ecological part of biodiversity.

Note: Colour and product samples as well as colour charts may deviate from the original product or the original colour tone for technical reasons. Therefore, a practical test is recommended before processing. Product or colour tone mixtures will not be taken back. Any claims concerning product and colour tone mixtures are hereby expressly excluded. Country house romanticism revisited

In combination with wood, the delicate *teal 25* radiates cosiness and warmth. The shades of blue have an inspiring effect and give rooms a certain nonchalance that goes well with traditional design. The interplay of sea tones and wood accents perfectly round off the country house style.

Nature

A pleasant atmosphere for every style of living
Natural brown tones such as *beige brown 20* in combination with noble pink nuances fill the room with a soothing harmony and form the basis for authentic living. By complementing the pastel colours, the room radiates a special freshness.

In harmony with nature, growth and balance
Especially the combination of green and brown has an optimistic and, at the same time, calming effect. The powerful *moss green 05* creates a relaxed atmosphere in the living room. Rooms are given a natural feel with the authentic colour accents that turn it into an impressive home. (See front cover for „light teal“.)

Vintage

Modern

Stimulating and surrounded by sunlight
Warm yellow tones create an atmospheric and friendly ambience in living spaces. The harmonious *golden honey 20* looks noble with the selection of modern furniture. The grey tones neutralise the room, allowing the coloured surfaces to come into their own even more.

Unconventional and natural living
With this style of furnishing both is possible. The bright red tone *light coral 32.3* sets strong accents on walls. Its intensity radiates pure joy of life and positive energy. The placement of the complementary colours creates a warm atmosphere and gives the living area an extra portion of cosiness.

Boho Chic
